SMALLER STOCKS OF SOYBEANS AND MOST GRAINS

Stocks of the four feed grains on April 1, 1965 totaled 113 million tons -- 13 percent less than a year earlier and the smallest April 1 feed grains holdings since 1958. Wheat stocks were also the smallest since 1958 and soybeans in storage were 8 percent less than the record high of a year earlier, according to the Crop Reporting Board. Although all wheat stocks declined, durum wheat holdings were larger than a year earlier. Flaxseed stocks were one-fourth smaller, but rye in storage totaled 60 percent more than a year earlier.

All wheat in storage on April 1, totaling 1,146 million bushels, was the smallest for that date since 1958. April 1 stocks were 5 percent less than a year earlier and 28 percent below average. The decline in stocks occurred in off-farm holdings which totaled 882 million bushels, 16 percent smaller than a year earlier. Farm stocks at 264 million bushels were 72 percent larger than a year earlier. About 72 percent of the total stocks were either owned by the Government or under Government loan compared with 86 percent on April 1 a year ago. Disappearance during the January-March quarter was 304 million bushels, the smallest for this period since 1959.

Durum wheat stored in all positions on April 1 totaled 80.5 million bushels, 31 percent above a year earlier. Farm stocks totaled 38.8 million bushels, nearly four times last year while off-farm holdings of 41.7 million bushels showed an 18 percent decline.

Rye in storage on April 1 -- 17.3 million bushels -- was 60 percent above April 1, 1964 and the largest April 1 holdings since 1961. The increase from a year earlier was largely in farm stocks which totaled 9.4 million bushels, nearly three times last year's low level. Off-farm holdings of 7.9 million bushels were 8 percent higher. Nearly one-third of the total stocks was either Government owned or under Government loan compared to about a tenth a year earlier. Disappearance during the January-March quarter was 3.9 million bushels, about the same as a year earlier.

Corn in all storage positions on April 1 totaled 2,836 million bushels -- 14 percent less than last year and 13 percent below average. April 1 stocks were about in line with the smaller 1964 production which

was 13 percent less than the previous year. Current holdings indicate a disappearance of 1,086 million bushels during the January-March quarter, about the same as a year earlier.

Farm stored corn totaled 1,897 million bushels, 17 percent less than last year and the smallest total since 1959. One-third of the farm stocks were under Government loan -- about the same percentage as on April 1, a year ago. Off-farm stocks of 939 million bushels were 7 percent less than last year and the smallest April 1 holdings since 1956. Corn owned by or under loan to CCC made up 74 percent of the off-farm total compared with 79 percent a year ago.

Oat stocks in all storage positions on April 1 totaled 473 million bushels, down 44 million bushels from a year earlier, and the smallest holdings since 1948. Farm holdings of 403 million bushels were also the smallest since 1948 while off-farm stocks of 71 million bushels were above average for this date. Oats owned or under loan to the CCC accounted for one-fifth of stocks in all positions. Disappearance since January 1 totaled 238 million bushels, the smallest since these records began in 1944.

Barley stored in all positions on April 1 totaled 205 million bushels, 28 million bushels less than a year earlier and 17 percent below average. Most of the decrease from a year earlier occurred in farm stocks which totaled 107 million bushels compared with 132 million last year. Off-farm stocks of 98 million bushels were down only 4 million bushels. About one-fifth of all holdings are owned or under loan to the Government. Disappearance from all positions during the January-March quarter totaled 105 million bushels, 6 million bushels more than for this period last year.

Sorghum stocks in all positions totaled 769 million bushels on April 1, 9 percent less than a year ago, and 1 percent below the average for this date. Both off-farm holdings of 670 million bushels and farm holdings of 99 million bushels were well below a year earlier. About 82 percent of the holdings were owned or under loan to CCC. Disappearance from all positions during the January-March period totaled 183 million bushels, the same as for this period a year ago.

Soybean stocks in all storage positions on April 1, 1965 totaled 347 million bushels, 8 percent less than the record high 377 million bushels on hand a year earlier. The decrease occurred in farm holdings as off-farm stocks at 249 million bushels were 34 percent larger

than on April 1 a year ago.

April 1 stocks indicate a disappearance during the six-month period October 1964 - March 1965 of 385 million bushels from a supply of 732 million bushels (carryover of 32 million plus 1964 production of nearly 700 million bushels). During the period 253 million bushels were processed for oil and approximately 120 million bushels were exported. In addition, some new crop beans were crushed and exported prior to October 1 and minor quantities were fed to livestock during the six-month period.

Flaxseed stocks in all storage positions on April 1 totaled 17.6 million bushels, a decrease of 6.7 million bushels from holdings a year earlier. Off-farm stocks accounted for most of the decrease, with holdings down a third from April 1, 1964. Farm stocks, a third of the total stocks in all positions, were down only 15 percent from a year earlier.

Stocks on April 1, 1965 indicate a disappearance during the July 1964-March 1965 period of 20.0 million bushels from a supply of 37.5 million bushels (carryover of 13.1 million plus the 1964 production of 24.4 million bushels). During the period 16.7 million bushels were processed and 5.9 million were exported
